EurAsian Journal of BioSciences (EurAsia J BioSci) is an international, refereed electronic journal. It publishes the results of original research in the field of Biological Sciences restricted to: morphology, physiology, genetics, taxonomy, ecology and biogeography of both procaryotic and eucaryotic organisms. The journal encourages submission of manuscripts dealing with plant biology, animal biology, plant physiology, microbiology, hydrobiology, ecology and environmental science, ethnobiology, biodiversity and conservation biology.

The journal welcomes full "research papers", as well as short "research notes". Papers will be published in English. The primary criteria for publication are scientific quality and biological significance.
